Clean up spills immediately observing the precautions in Section 8 of this MSDS. Isolate the hazard area and keep unnecessary and unprotected personnel from entering. Prevent material from contaminating soil or from entering sewage and drainage systems and bodies of water.

SMALL SPILLS: Vacuum or sweep up material and place in a container for reuse or disposal. Clean contaminated floors and objects thoroughly, observing all environmental regulations.

LARGE SPILLS: Avoid creating a dust cloud. Vacuum or sweep up material and place in a container for reuse or disposal. If necessary, reduce airborne dust and prevent scattering by moistening with water. Pick up wash liquid with additional absorbent and place in a disposable container. After removal, flush contaminated area thoroughly with water.
